About the Mapbook

Design

The *County Mapbook* divides the county into smaller maps. These maps are referenced using the grid index on the inside front cover.

Accompanying the Mapbook is a county road summary which lists each road and the maps within the book where it can be referenced.

The scale for core maps is 1:22,000 and one inch equals approximately .3 miles.

Navigation

Every map in the book is aligned with true geographic north. Additionally, each of the maps connects on one or more sides with surrounding maps, so you can follow a road across the county onto an adjacent map.

The number highlighted in orange is the page number. Adjacent map page numbers are indicated by the number with the blue triangle.
